

Corrosion Case Study

CORROSION REMOTE VISUAL INSPECTION

The National Association of Corrosion Engineers (NACE) estimates that corrosion costs the United States \$276 billion every year. Every non-service industry is impacted to one degree or another by the direct or indirect costs of corrosion prevention, mitigation or repair. The VJ-ADV is the ideal choice for any technician involved in corrosion control. No other borescope offers this level of performance, quality, and ease-of-use. Our great features, combined with our very competitive pricing, make your buying decision easy. Take a closer look at how the VJ-ADV allows you to see corrosion at work in areas virtually inaccessible to the naked eye.
